MOUNTING AND OPERATING:

MOUNTING OF VALVE AND ITS SERVICE SHOULD BE MADE BY ORGANIZATION THAT HAS RIGHTS TO MAKE THAT KINDE OF WORKS. THE PERSONEL OF THOSE ORGANIZATIONS IS SUPPOSED TO BE QUALIFIED.

Before valve will be installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of flow must be checked with the parameters of valve. Stop globe valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operate strictly with its assign. To make valve unfailing you must observe the following suggestions:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities.
- the valve must be protected from any mechanical damages during his work.
- parameters should be the same as on the valve.
