

# CHECK VALVE TYPE 464

## CHARACTERISTIC:

Diameter	-	15 -200 mm;
Pressure	-	100 bar;
Temperature	-	up to 560°C (with PTFE sealing up to $\leq 200^{\circ}\text{C}$ );
Medium	-	water, steam and other non-toxic, non aggressive liquid and gas media and engine fuel.

## VERSIONS:

**type / ends / body material / disc and disc ring / others**

**Example:** 464 / --- / --- / --- / ---

**Example:** 464 / S / U / P / ---

Ends	Sign	Body material	Sign	Disc and disc ring	Sign	Others	Sign
Standard – flanged	---	(P250GH) C 22.8 or GP240GH	---	Standard	---	-----	---
Butt weld ends	<b>S</b>			PTFE ring	<b>P</b>		
Socket weld	<b>SW</b>	16Mo3 or G20Mo5	<b>U</b>	NBR ring	<b>N</b>		
Threaded	<b>G</b>	13CrMo4-5 or G17CrMo5-5	<b>A</b>	STELLIT ring	<b>L</b>		

## APPLICATION:

The check valve is designed to keep pipeline safe from returning the medium.

## MOUNTING AND OPERATING:

*The valve can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the valve may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.*

Before a valve is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the valve. Check valve can be mounted to a pipe-line in any position. The direction of flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide valve's reliability the following suggestions must be observed:

- medium flowing through the valve is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve must be observed.
