

GATE VALVE TYPE GKA25

CHARACTERISTIC:

Diameter	-	50 -350 mm;
Pressure	-	25 bar;
Temperature	-	up to 250°C for acids, bases and other aggressive media;
	-	up to 550°C for non-toxic media;
Medium	-	acids, liquors, water, steam and other non-toxic and non aggressive media, engine fuel and sea water

VERSIONS:

type body material / drive type / others

Example: GKA25 / --- / --- / ---

Example: GKB25 / NA / ---

Type	Body material	Sign	Drive type	Sign	Others	Sign
X6CrNiTi18-10 (1.4541)		GKA	Hand wheel	---	-----	---
X5CrNi18-10 (1.4301)			AUMA drive	NA		
			NWA drive	NW		
X2CrNiMo17-12-2 (1.4404)		GKB	MODACT drive	NM		
			Pneumatic drive	NP		

APPLICATION:

Gate valve is designed to open and stop the flow. The gate valve can be mounted to a pipeline in any position. It should operate in a close or open position.

MOUNTING AND OPERATING:

The gate can only be mounted and operated by skilled, properly trained and qualified personnel. Incorrect assembly or operation of the gate may have substantial impact on the entire system such as fluid leakage, reduction in system's function etc.

Before a gate is installed the pipeline must be clean from any mechanical impurities. The compatibility of critical parameters of the flow must be checked with the parameters of the gate. Gate can be mounted to a pipe-line in any position. The direction of the flow should only comply with the arrow marked on the body. The valve should be operated strictly with its assign. In order to provide gate's reliability the following suggestions must be observed:

- medium flowing through the gate is supposed to be clean out of any mechanical impurities;
- the valve must be protected from any mechanical damages during its work;
- nominal parameters marked on the valve must be observed.
